RE: Match Word – Before We Proceed

Hi Gregory,

Thank you for working with me on the budget – I genuinely appreciate that and I can see you put real thought into this.

Before I confirm and fund Milestone 1, I want to share something with you because I think it's important.

When I wrote to you about why I am building Match Word – my background as a social worker, senior loneliness being a genuine crisis, wanting to give seniors a reason to connect – that was not just a nice story. That IS the product. Match Word is not just a word game. It is a social lifeline dressed up as entertainment.

The friend-making feature – the ability for two strangers to meet in a game and choose to connect again – is not a nice-to-have that can wait for Phase 2. It is one of the core reasons this game exists. Without it, a senior who meets someone wonderful in a game has no way to find them again. That is the loneliness problem I am trying to solve, sitting right there in the app.

I completely understand you are thinking like a developer managing scope and budget, and I respect that. But I want to make sure we are truly aligned on what this game is trying to do before we go any further.

With that said – can you tell me what it would cost to bring the friend connection feature and the Prize Room back into Phase 1? I want to understand the number before I make any decisions.

I am not in this to make a lot of money. At \$5.99 a month this is about impact, not profit. I chose you from a very large pool of applicants because I believed you understood that vision. I would love for us to find a way forward together – but I do need to feel confident that we are building the right thing, not just a scaled-back version of it.
